YOUR ORDER ARRIVES

STEP 7

Your order will arrive in 3-4 weeks. Someone will call you to arrange delivery.

- A. The order will be delivered inside the building, **ground floor, one location.** **Check the order before the driver leaves** to make sure the correct number of boxes are delivered. If there is any serious damage to any boxes, be sure to indicate that when you sign for the order. The driver should also give you all of the paperwork affixed to the outside of the pallet. If you do not receive this from the driver, ask for it. You should receive a packing list and a reconciliation form like the one attached.
- B. It is best that the distribution be organized in a large area such as the gymnasium or cafeteria. Be prepared to direct the driver to a parking area as near as possible to the area where distribution will be set up. If possible, take out the center portion of the entrance door so that the pallet can be brought in as one piece. ***We suggest that you recruit two helpers per pallet if the center bar cannot be removed.***
- C. Once all of the pallets have been taken to the distributions area make a quick count of how many pallets you have received. It is not necessary at this time to count each flavor (we will cover that later). Make a note on the delivery receipt of how many pallets you receive and sign as the driver directs. He is now finished with his part and free to leave.
- D. Sort all boxes by flavor. Each box will be color-coded by flavor and should not contain more than one flavor. It is best to arrange the flavors in the same order as the student printout.
- E. You must complete the reconciliation form **BEFORE DISTRIBUTION.** Indicate in 'Qty. Received' column how many of each flavor you have received (6 units per case). Please be diligent in not allowing anyone to take any product before you have accounted for everything ordered.

Continued Distribution:

- F. Begin distribution by having helpers at the beginning of the distribution line. Give each parent/student their order form and an itemized printout of their order. The parent/student then proceeds to the fulfillment line where volunteers are there to assist in helping them fill their order. Using the printout of the student's order, obtain the correct quantity of each flavor. At the end of the fulfillment line have checkers count the number of items ordered.
- G. If you need additional product it can be shipped the following week, please contact your sales representative.
- H. If you have any product not picked up on the day of distribution, **do not panic**. It is okay to leave cookie dough at room temperature up to 21 days. It can be refrigerated for up to six months and kept in the freezer for one year. The cookie dough can be thawed and refrozen over and over.

Good Luck**
